

# Community Health Connect Guidelines

With the new Community Health Connect program in place we have the following guidelines when treating adults.

- Step 1 - Resolve the disease: Take care of periodontal disease and carries.
  - ✓ Hygienist to educate patient on proper hygiene and techniques
  - ✓ Doctor to get commitment from patient to follow through with proper hygiene and to come on time to all scheduled appointments in order to continue charity work.
- Step 2 – Resolve pain: Extractions as needed. Endo procedures IF patient commits to following up with crown and permanent restorations. (Discussion between doctor and patient)
- Step 3 – Optional: Permanent restorations such as crowns, flippers, bridges, partials, dentures, and implants are offered to patient at our discounted “bishop” price (60% off standard fee).

*\*Doctors will decide on a case by case basis what they feel comfortable with in providing additional services.*

## Notes:

- Pop-up to be added to account (i.e. Dr. B's patient) & always schedule with same doctor once treatment plan has been decided.
- We CAN NOT set up payment plans for Community Health Connect patients! We do offer a **Layaway program** = Patient can make payments on their account and build up credit until they have enough on their account to begin the procedure. Care credit is also available to those who qualify.
